Covid variants cases jumped from 10% in May to 51% till June 20

Unfair to put a date for Covid 3rd wave arrival, says Task Force chief

PNS ■ NEW DELHI

Even as there has been rising concern over the Delta plus variant of the virus, Covid Task Force chief VK Paul on Monday asserted that neither there is any scientific data so far to establish that the new variant is highly transmissible or reduces vaccine efficacy nor any date when it would arrive.

"It will be unfair to put a date for any Covid wave as the behaviour of coronavirus is unpredictable and a disciplined and effective pandemic response can help the country get away from any significant outbreak," he said.

His assertion yet again comes in contrast to AIIMS

chief Randeep Guleria's prediction that the third wave will come in next eight weeks. Dr Arora had on Sunday also cited an ICMR study to claim that the third wave of coronavirus could be delayed until December this year.

Dr Paul said that another wave of any size would be dependent upon several factors, including overall discipline in terms of Covid-appropriate behaviour, testing and containment strategies, and vaccination rates.

"And in addition, the unpredictable behaviour of the virus can also change the pandemic dynamics. In such a scenario, their complex factor will determine the chain of transmission and outbreak," he told a news agency.

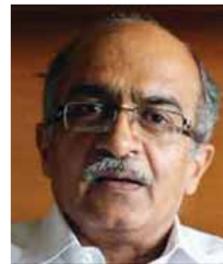

"Occurrence or non-occurrence of any wave, is in our own hands. To my mind, it is not fair to put any date for any wave," he said.

"If we are determined and disciplined and marshal effective pandemic response, we should be in a position to get away from any significant outbreak," Paul said.

Currently, three Covid vaccines — Covaxin by Bharat Biotech, Covishield by Serum Institute of India (SII) and Russia's Sputnik V — are being used for inoculation in India.

When asked about the Delta plus variant, Paul said scientific knowledge about it is still in the early stage. "We should wait for these aspects to be studied systematically," he pointed out.

Bhushan creates jab row, says won't get vaccinated

PNS ■ NEW DELHI

Noted lawyer Parashant Bhushan created a flutter on Monday by tweeting that he is not going to take vaccines against Covid. Subsequently, he received a lot of brickbats in social media with netizens demanding Twitter to act against him for his tweets that were against the policy of the micro-blogging site.

In a series of tweets,

Bhushan said he is not anti-vaccine but against the promotion of universal vaccination.

Bhushan claimed the younger population has a higher chance of dying through vaccination as compared to suffering severe complications or even death due to coronavirus.

"For the record, I have not taken, nor do I intend to take any Covid Vaccine," tweeted Bhushan.

"The healthy young have hardly any chance of serious effects or dying due to covid. They have a higher chance of dying due to vaccines. The covid recovered have much better natural immunity, than the vaccine gives them. Vaccines may even compromise their acquired natural immunity," Bhushan said in a subsequent tweet.

Bhushan's stand against vaccination is not a new phenomenon.

PNS ■ NEW DELHI

The Centre on Monday informed a Parliamentary panel that Covid-19 cases with variants of concern rose from 10.31 per cent of total infections in May to 51 per cent till June 20 and stressed that both Covaxin and Covishield work against these strains albeit with slightly reduced potency.

Sources said the panel, headed by Rajya Sabha member Anand Sharma, was also informed that the economic impact of the second wave of viral infection was "asynchronous in its onset and wider in its spread particularly in rural hinterland."

Union Home Secretary Ajay Bhalla, Health Secretary Rajesh Bhushan, Additional Secretary in the Home Ministry Govind Mohan, Additional Secretary in the Finance Ministry K Raja Raman were among the officials who

deposed before the Parliamentary Standing Committee on Home Affairs on 'Socio-economic fallout of the COVID-19 pandemic's second wave'.

About the availability of vaccine doses, officials informed the panel that 135 crore jabs will be made available in the country during the August-December period this year.

The doses would be of Covishield, Covaxin, Bio E Subunit vaccine, Zydus Cadila's DNA vaccine and Sputnik V, they said.

Sharing details about various coronavirus variants of concern, officials told the panel that it includes the Alpha, Beta, Gamma and Delta variants. These variants have been traced in 174 districts of 35 states and Union Territories, with the maximum reported from Maharashtra, Delhi, Punjab, Telangana, West Bengal and Gujarat, the parliamentary panel

was informed.

According to the details shared by officials with the parliamentarians, coronavirus variants of concern led to increased transmissibility, change in virulence and effect on diagnostics, drugs and vaccines. "Officials told parliamentarians that the proportion of COVID-19 cases with vari-

ants of concern has risen from 10.31 per cent in May to 51 per cent in June 20," a source in the panel said.

A study by the Indian Council of Medical Research and the National Institute of Virology on the efficacy of Covaxin and Covishield against coronavirus variants of concern found that "antibody potency is slightly reduced against these strains as

compared to standard strain. But the vaccine is effective in protection against severe forms of the disease," the source added.

The panel was informed that a similar study on evaluating the efficacy of both these vaccines against the latest variant of concern -- Delta plus -- is being conducted and will be completed within the next two weeks.

India reports 40,845 black fungus cases, 85% among Covid patients

PNS ■ NEW DELHI

In the Covid second wave so far, India has reported 40,845 cases of mucormycosis or black fungus, of which nearly 85 per cent has been seen in coronavirus-infected patients. The fungal disease has already claimed 3,129 lives.

These data were shared by Union Health Minister Harsh Vardhan in a meeting of the group of ministers on Covid on Monday.

Since April, mucormycosis infec-

tions have skyrocketed across the country. Till June 7, more than 28,000 cases had been officially reported, thus showing that the cases have nearly doubled since then.

Mucormycosis mainly affects people who are on medication for health problems that reduces their ability to fight environmental pathogens.

It is not subsidised as 80 districts in the country have high positivity. "There shouldn't be any laxity at this stage," said the ICMR chief at a meeting of the group of ministers on Covid.

Disclosures pursuant to Regulations 52(4) and 52(7) Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015.

- Credit Rating : IND AA+ (CE)
- Change in credit rating : Yes
- Asset Coverage Ratio : 144% (March 31, 2020 : 135%)
- Debt Equity ratio : mentioned above
- Debt Service Coverage Ratio : mentioned above
- Interest Service Coverage Ratio : mentioned above
- Previous due date for the payment of interest/ repayment of principal of non convertible debt securities and whether the same has been paid or not (as on March 31, 2021)
- Previous due date for the payment of interest: March 31, 2021 and the same was paid
- Previous due date for the payment of principal: March 31, 2021 and the same was paid
- Next due date for the payment of interest/ repayment of principal of non convertible debt securities (as on March 31, 2021)
- Next due date for the payment of interest : April 30, 2021
- Next due date for the payment of principal : September 30, 2021
- Outstanding redeemable preference shares (Quantity and Value) : Not Applicable
- Net worth : INR 1,559,163 (March 31, 2020 : 1,530,234)
- Net profit after tax : mentioned above
- Earning per share : mentioned above
- Debtenture Redemption Reserve : INR 344,312 (March 31, 2020 : 344,312)
- There are no material deviation in the use of proceeds of issue of Non Convertible Debtentures from the objects stated in the offer document (Regulations 52(7))

- Notes :
- Ratios have been computed as follows :
 - Earning per share = PROFIT after Tax / Weighted average number of equity shares
 - Debt Equity Ratio = Debt (Amount due to Debtenture Holders) / Equity (Equity share capital, share premium, quasi equity i.e. Short term borrowing but excluding unamortized fees)
 - Interest Service Coverage Ratio = Profit before interest, prior period items, tax, extraordinary items and depreciation / Total Interest Expense
 - Debt Service Coverage Ratio = (PAT based on Project Revenues realised (excluding non-cash adjustments, if any) + Depreciation + Interest (Interest, Guarantee Fees, other financing costs payable under Debtenture and Project Documents)) / (Interest + Principal Repayment + Guarantee fee)
 - Asset Coverage Ratio = Total Assets/ Debt (Amount due to Debtenture Holders)
 - * As per Debtenture Trust Deed dated 11 September, 2015.
 - ** Generation based incentive have been included in computation of Project Revenues realised Net worth represents issued subscribed and paid up capital plus reserves and surplus. Reserves and Surplus includes Capital reserve, General reserve, Debtenture redemption reserve, Securities premium account and Profit and loss account balance.

2. The statement has been prepared in accordance with the Indian Accounting Standard as prescribed under Section 133 of the Companies Act, 2013 (the Act) read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and relevant rules issued thereunder and other recognized accounting practices and policies.

3. The company is in the business of development and operation of wind power. There is only one segment (business and/or geographical) in accordance with the requirements of IND AS - 108 "Operating Segments".

4. The above audited financial results have been approved by the Board of Directors in their meeting held on 28 June 2021.

5. The format for audited results as prescribed in SEBI's circular CIR/IMD/DF1/69/2016 dated August 10, 2016 has been modified to comply with requirements of SEBI's circular dated July 5, 2016, Ind AS and Schedule III (Division II) to the Act applicable to companies that are required to comply with Ind AS.

6. The figures for six months in each of the years are the balancing figures between audited figures in respect of the full financial year and figures upto the end of first half of the respective financial year which were subjected to limited review.

7. India Ratings and Care Ratings has assigned long term issuer rating and rating for the outstanding non-convertible debtentures of the Company to "IND AA+ (CE)" with negative outlook and CARE AA (CE) with stable outlook.

8. As per debtenture trust deed, the Company is required to maintain a Debt Service Coverage Ratio ("DSCR") for 1.20, however on account of slow recovery from debtors during the year, the Company could not achieve a DSCR for 0.02 thereby a breach for one of financial covenant. This breach is not considered as an event of default as per the terms of Debtenture Trust Deed. Hence, no adjustment has been made to the financial statements of the Company.

9. Due to outbreak of COVID-19 in India, the Company has continued its assessment of likely adverse impact on economic environment in general and financial risks on account of COVID-19. Considering that the Company is in the business of generation of electricity which is an essential service as emphasised by the Ministry of Home Affairs and Ministry of Power, Government of India and which is granted "Must Run" status by Ministry of New and Renewable Energy (MNRE), the management believes that the impact of outbreak on the business and financial position of the Company is not significant.

Further, MNRE directed that the payment to Renewable Energy power generator shall be done on regular basis as being done prior to lockdown and the Company has generally receive regular collection from its customer. The management does not see any risks in the Company ability to continue as a going concern and has been able to service all debts obligations during the year. The Company is closely monitoring developments, its operations, liquidity and capital resources and is actively working to minimise the impact of the unprecedented situation.

The Balance Sheet as at March 31, 2021 and March 31, 2020 as per Schedule III of the Companies Act, 2013 is attached as Annexure 1.

Two unexploded IEDs to demystify attack on Jammu Air Force station

RAKESH K SINGH ■ NEW DELHI

Two unexploded IEDs recovered from the Jammu air force station hold clues to the investigation into the early morning airdropping of two other IEDs that exploded at the communication and logistics hub of the Indian Air Force.

The recovery of the unexploded IEDs has further added to the mystery of the first-ever drone attack on an air force asset as it indicates that the two suspected drones or the quadcopters had a significant payload carrying capacity.

The aerial attack is a first of its kind in the country. But this is the 45th drone strike carried out across the globe so far this year. While drone strikes are carried out by state agencies, aerial hits by terror groups through such machines are dubbed 'attacks' and the agencies are seeking to discriminate between the two through the ongoing investigation.

Security agencies, meanwhile, are tracking Jammu-Pakistan calls after leads gathered from analysis of cell phone tower dump data even as a few Rohingyas are also under surveillance, sources said.

In the wee hours on Sunday, two blasts occurred at about 0140 Hours and 0146 Hours at the Air Force Station, Satwari, Jammu. The blasts occurred near Helicopter Dispersal Park. While one of the IEDs hit the top of the single-storey building the second explosive device hit the open

ground area behind the structure.

Due to the impact of the IED blast at the rooftop, a crater was formed and the sound of the explosions was heard in a range of one kilometer which indicate use of high-grade explosives like RDX or PETN even as the forensic reports of the nature of blast material is awaited. Since the thickness of the roof built from RCC (reinforced concrete cement) slabs is between six to nine inches, low grade explosives could not have formed the crater, officials said.

"These pointers helped the investigators in concluding that the blast occurred due to an aerial/drone attack and that the likely target was a helicopter parked at the Helicopter Dispersal Park," an official involved in the investigation said. No fatal casualty was reported from the incident.

The whirring sound of only two drones was heard. Following this, two out of four IEDs went unexploded and the investigators are studying the materials used for fabricating them.

All the IEDs were equipped with impact charge features to modulate the timing of the explosions.

The one that exploded on the roof of the building exploded just after hitting the surface. The other one that exploded in the open ground blasted after six minutes.

Cell phone tower dump data of the mobile phone network is also

being analysed to trace possible clues or calls made in the immediate aftermath of the explosions at the air facility in Jammu. Jammu-Pakistan phone calls are also being tracked in order to trace the masterminds of the drone attacks, investigators related to the drone attacks probe said.

"It is highly plausible that dismantled drones were smuggled from Pakistan and assembled in Jammu before carrying out the attack on the air force station. However, the possibility of a drone flying from Pakistan to hit the target in Jammu is also being investigated. If the machines originated from Pakistan, then operation could be the handiwork of the state actors there," officials added.

Meanwhile, the security agencies have conducted searches in a hamlet close to Satwari which is dominated by Rohingyas.

The security agencies are also grilling one arrested accused Nadeem, 20, from whose possession 5 kg IED was recovered by the Special Operations Group (SOG) of Jammu police on Sunday evening. Nadeem hails from Banihal town and was arrested by the SOG from Narwal area under Trikuta Nagar police station. Linkage between the seized IED and the drone attack is yet to be established.

Belying the prevailing trends in Jammu and Kashmir, no terror group has so far owned responsibility for the drone attacks.

Advanced nuclear-capable 'Agni' successfully test-fired

PNS ■ NEW DELHI

India on Monday successfully test-fired a new variant of the nuclear-capable Agni ballistic missile. The missile followed text book trajectory, meeting all mission objectives with high level of accuracy, officials said here.

Agni Prime is a new generation advanced variant of Agni class of missiles. It is a canisterised missile. Defence Minister Rajnath Singh Monday congratulated the DRDO for successfully flight testing the missile.

"Congratulations to @DRDO_India for the maiden successful flight test of Agni P advanced

variant of Agni class of missiles. I compliment the efforts of the team behind this mission," he tweeted.

He said many advanced technologies, including propulsion systems, innovative guidance and control mechanisms and state-of-the-art navigation systems have been introduced in the missile.

Agni Prime is a next-generation, nuclear-capable weapon made fully of a composite material.

Two days ago, the DRDO successfully test fired an extended range version of the indigenously developed 'Pinaka' rocket.
